

Field of Awakening

Core Distinctions

(some of them)

Group as Organism

Feeling and attuning to the group as a single coherent living being.

Emergence as Leader

Putting aside agendas and preconceptions, welcoming the unknown and aligning with how the life force wants to move through us.

Inner vs Outer Authority

Claiming our inner resources and multiple multidimensional intelligences as our sovereign authority.

Relationship to Impulse

Cultivating how we orient to our impulses — lessening habitual behavior and broadening our response options.

Source of Impulse

Increasing our awareness and understanding of where each impulse originates — giving us a deeper insight as to how we want to relate to the impulse.

Speaking 'From' vs 'About'

Communicating from *within* an experience rather than reporting *about* it, which is usually a detached mental interpretation which prevents felt attunement from others.

Awareness & Responsibility

If you are aware of it, you are responsible for it — see what happens when you approach life this way. You may be the only one who can address what you see.

Participant vs Spectator

There are no spectators in life — you are life. Bring your full self and claim your integral soulful place in the eco-matrix of life.
